

## CTC Training Course

This two-day Certification Training Course will focus on all aspects of laser-assisted dentistry. It will follow the teaching method of Tell, Show, Do and Teach Each Other utilizing a combination of lecture, laser hands-on with extracted teeth and animal jaws and/or live patient demonstrations.

The curriculum will include the following topics:

### I. Practice Implementation;

- Patient Buy In
- Staff Buy In
- Insurance Billing
- Internal/External Marketing
- Realistic Expectations for the 1st 90 Days i.e. “It is an instrument...not a concept”

### II. Laser Energy & Safety

### III. Complete Laser System Overview;

- Buttonology
- Tip Selection & Tip Cleaning
- Mirror Replacement
- Trouble Shooting

### IV. 7 Fundamental Procedures;

- Soft Tissue Biopsy
- Class I & V Cavity Preparations
- Gingivectomy/Gingival Recontouring
- Frenectomy/CSF
- Osseous Crown Lengthening
- Troughing for C & B Impressions
- Endo Disinfection

### V. Introduction to Advanced Concepts that can be learned in the BIOLASE University Master Laser Courses.
